FELIX ELIGBUE

BACKEND SOFTWARE ENGINEER

+234 810 885 0572 | philixbob@gmail.com | GitHub: github.com/Philix27 | LinkedIn: philix

PROFESSIONAL SUMMARY

Backend Software Engineer with 5+ years of experience building fintech, financial services, and enterprise applications using Go, .NET/ASP.NET Core, NestJS, and TypeScript. Experienced in designing and maintaining RESTful and GraphQL APIs, developing backend services, working with relational and NoSQL databases, and implementing asynchronous and event-driven systems. Strong hands-on experience with C#/.NET, PostgreSQL, SQL Server, Redis, Docker, CI/CD, automated testing, and messaging systems. Fintech experience includes cryptocurrency platforms, financial applications, payment-related workflows, third-party integrations, and transaction-oriented backend systems.

TECHNICAL SKILLS

Backend: Go, Fiber, C#, .NET Core, ASP.NET Core, NestJS, TypeScript, Express.js, REST, GraphQL, Microservices
Databases & ORM: PostgreSQL, SQL Server, MySQL, MongoDB, Prisma, TypeORM, Mongoose, Sequelize, Drizzle ORM
Distributed Systems: Redis, BullMQ, Rabbit MQ, Messaging Systems, Event-driven Architecture
DevOps & Testing: Docker, GitHub Actions, CI/CD, Jest, Supertest, Testcontainers, Integration Testing, E2E Testing
Blockchain/Web3: Celo, Solidity, Wagmi, Mento Protocol

PROFESSIONAL EXPERIENCE

Alert Microfinance — Software Engineer | October 2025 – Present

- Develop and maintain backend REST APIs for financial services applications.
- Work with C#/.NET and backend technologies to develop and maintain
- Led a 3 man team on an Ecommerce project
- Design architecture and carryout code reviews on project
- Implement automated testing within GitHub Actions CI/CD pipelines for consistent test execution and rapid development feedback.
- Work with PostgreSQL, Redis, and BullMQ for application data, caching, and background processing.
- Collaborate with engineering teams on backend development, API implementation, testing, and production releases.

Technologies: C#, .NET Core, PostgreSQL, Redis, BullMQ, Docker, GitHub Actions, Testcontainers, Supertest, OpenAPI

Mobarter Finance — Software Engineer | August 2024 – October 2025

Fintech/Web3 personal finance platform focused on digital assets and financial services.

- Developed and maintained backend services using Go (Golang), Node.js/NestJS, and TypeScript for financial and cryptocurrency application workflows.
- Built and integrated RESTful and GraphQL APIs supporting core application functionality and financial transactions.
- Implemented cryptocurrency swap functionality using the Mento Protocol SDK on the Celo blockchain.
- Designed and implemented backend services using PostgreSQL, Redis, and BullMQ for data management, caching, and asynchronous processing.
- Contributed to the development of scalable and modular backend architecture, translating business requirements into production-ready services.
- Worked on blockchain-based financial functionality, including cryptocurrency transactions and locked savings features.

Technologies**:** Go, NestJS, Node.js, TypeScript, Prisma, Redis, BullMQ, GraphQL, Solidity, Wagmi, Celo, Mento Protocol

Doow Finance — Software Engineer | January 2023 – April 2024

Fintech company focused on helping startups and businesses manage financial expenses.

- Developed backend services and APIs for a fintech application using NestJS, Prisma, and PostgreSQL.
- Created GraphQL endpoints for frontend applications.
- Translated business requirements into application logic and technical implementations.
- Tested API endpoints to support stable application releases.
- Set up and manage CI/CD pipelines using GitHub Actions.
- Provided technical guidance on application architecture and business logic.
- Managed a four-person frontend development team.
- Contributed to project planning, design evaluation, development schedules, and delivery timelines.

Technologies: NestJS, Node.js, TypeScript, Prisma, PostgreSQL, GraphQL, Jest, GitHub Actions, Next.js, Nuxt.js, Storybook, Cypress

---

Hexelan Consulting — Software Engineer | July 2021 – March 2022

Technology consulting firm developing software solutions for government and private-sector organizations.

- Built web applications from Figma designs and translated requirements into functional software.
- Created and consumed REST and GraphQL APIs.
- Managed application state using Redux and Redux Thunk.
- Developed reusable React components and implemented component testing using Storybook and React Testing Library.
- Managed a MongoDB database containing millions of user records.
- Worked with Kafka messaging to handle high volumes of application requests.
- Set up and managed development and production environments.

Technologies: Next.js, React, Redux, MongoDB, PostgreSQL, Express.js, Prisma, TypeORM, Bull MQ, Firestore

---

Pharmahub — Software Developer | November 2019 – March 2021

Educational mobile application for pharmacists and other healthcare professionals preparing for professional examinations.

- Built a cross-platform mobile application using Flutter and Dart.
- Integrated backend services and APIs.
- Collaborated with the development team on application business logic.
- Participated in sprint planning, retrospectives, and pair programming.
- Deployed the application to the Google Play Store and Apple App Store.

Technologies: Flutter, Dart

EDUCATION

Bachelor of Science (B.Sc.) | 2013 – 2019
